Telecommunications Systems Management
Student of the Month

Name: **Zach Blandford**

MSU Degree:
B.S., Telecommunications Systems Management
Network Security Option

Home Town:
Owensboro, KY

Current Job:
Yes, I work for WK&T on the Tech Team.
.

Family & Personal:
My parents and family have been very supportive during my attendance at MSU, but that just means they save all the computer repair for when I come home as repayment. While I enjoyed my life in Owensboro, I do hope to move out of it to look for work, though that doesn't mean that I need to go too terribly far.

TSM Q & A:

Why did you major in TSM?
I've always like the networking aspect of computer science, and a friend from high school let me know about the TSM program, so I decided to try it out. I never really wanted to just be computer oriented, so when I learned that the degree offered a bit of business and networking, I felt that it could be a good fit.

What do you do for fun?
I like to go to the movies, play games, listen to music, and just generally hang out with my friends.

Where do you see yourself in 5 years?
I would like to be a few years into the job that I could consider a great career. I'm not afraid of moving out of state, and welcome the opportunity. So hopefully something pleasantly unexpected will happen in the future.
