

Todd Schoborg (2008)

Biochemistry

“The training I received through my NSF-supported undergraduate BioMath project gave me a solid foundation in research and the knowledge, skills and confidence I needed to succeed in the rapidly evolving field of biology. My undergraduate research experience was instrumental in my recent appointment as an NSF Graduate Research Fellow in the University of Tennessee-Knoxville’s Ph.D. program and has allowed me to make substantial progress on my graduate work.”
