

WHAT I WISH I HAD KNOWN

- The program in general, I feel, is invaluable. Not only do I feel prepared to begin my career I my personal growth from this program has made me a better leader in my family and in my community
- I am truly grateful for the insight and self-awareness that I gained from this program.
- I think the idea of an HDL orientation would have been very beneficial to me.
- I wish that I had known about the expectations of comps. to be better prepared.
- I would have liked to know more about occupational applications of the HDL masters and mentoring on how to continue my education from here.
- I wished I knew a little more details about the HDL program itself when I first started. The program was great overall.
- I would have liked to have had an orientation just to gain a better idea of what expectations were needed to be met and so that I could have been better prepared to take on the responsibilities.
- I wish I had some information of each concentration area, what jobs I could look to get with each area, and that certain electives were only offered in certain semesters. Overall I have enjoyed the program and think I have personally grown from it.
- I wish I had known more of what the course content would be. An orientation would have been great.
- I have really enjoyed the program. From the beginning of the program I pretty much knew what was expected so nothing came as a surprise to me. I have gained some valuable information from the HDL program that I can incorporate into my current job.
