

EPSB ADMISSION DATA

CAEP Standards: 1.3, 3.2

The Kentucky Education Professional Standards Board (EPSB) maintains a database of admitted student demographics. The agency tracks demographics such as gender, ethnicity, and GPA for IHE students based on a three-year rolling cohort. This table compares multiple cohorts' mean GPAs and mean PPST Content Area scores with state averages over the same periods of time. This information was extracted from the EPSB website. Program leadership uses these data to gauge the academic ability of admitted students as measured by GPA and admission tests and compared with state averages.
