Curriculum Development and Teaching Responsibilities

- FCS 266 Management of Family Resources (re-designed fall 2015): an undergraduate course, founded on an interdisciplinary and multi-theoretical exploration of both the process and concept of family resource management. Introduces learners to a global perspective, where they will begin to confront the capitalist-driven understandings driving consumption, labor, and time and

what could be considered its antithesis, a community-global perspective which offers a critique of the social service system: a perspective consistent with Catholic Social Teaching, Catholic Intellectual Tradition, and the critical institutional/professional missions of family & consumer sciences at a Catholic university. Students will utilize this perspective as they participate in and reflect upon a structured service learning experience based on current best practices, with selected community organizations (Covenant House, Epworth Child & Family Services, Marian Middle School).

- FCS 472 Curriculum in Family & Consumer Sciences (re-designed spring 2015): An undergraduate course aimed to prepare FCS education students for their work in comprehensive career & technical education programs and advisory roles in CTSOs (FCCLA)-- organized around an intellectual lens reflecting critical sciences, problem-based learning, and foundational STEM perspectives, students engage in authentic assessment; evaluate CTE curricula (Pro-Start and Hospitality, Tourism & Management Program [HTMP]); shape curricular recommendations; and outline curricular changes to strengthen programs with an integrative FCS perspective, inclusive of broad concepts and global perspectives central to a FCS critical science focus. Utilizing the statewide teacher evaluation system materials, students outline a personal professional development plan inclusive of short-, intermediate, and long-term goals. Students utilize distance communication to explore FCS commitments to STEM (interview Gayla Randel, KS FCS State Administrator/NASAFACS President) and the importance of messaging in PR campaigns (interview with Holly Spangler, Farm Progress).
- HES/FCS 395 Foundations of Public Policy and Advocacy in FCS (developed fall 2013): an undergraduate course, reflecting Fontbonne University's Mission Core initiative, and part of the department core, founded on the FCS body of knowledge, human ecological theory, and reflective human action model (RHA); students develop an appreciation for the wide range of policy work in FCS from its founding as home economics to current efforts, focusing specifically on the importance of collaboration to leverage resources, human energy and creativity necessary to promote change and increase participation in the democratic process. Reflecting the university's mission, it integrates a global perspective, whereby students interact with international organizations (Congregation of the Sisters of St. Joseph and Bread for the World) to explore their role as a global citizen. Inclusive of field work, students collaborate with Operation Food Search (a food pantry distribution center) and food pantries in the surrounding counties to promote the application for SNAP and voter registration.
- HES/FCS 533 Advocacy and Public Policy: Serving a World in Need (re-designed spring 2014): a graduate course and part of the department core, founded on critical science principles, Freire's *Pedagogy of the Oppressed*, FCS body of knowledge, and human ecological theory; students develop an appreciation for the wide range of policy work impacting children and families in FCS from its founding as home economics to current efforts, focusing specifically on the importance of grassroots efforts to support change generated at a community level. Inclusive of the tandem perspectives of policy for education and advocacy, students develop skills in family impact analysis and collaborate with University Extension to support the Healthy Corner Stores Project.
- HES/FCS 245 Housing (re-designed spring 2014): an undergraduate course, founded on the FCS body of knowledge and human ecological theory; students examine the complex experience of housing insecurity contextually (historically, politically, socially, legally); and develop an appreciation for public and private policy initiatives to address housing issues in relation to the

common good. Students examine living spaces from both micro- and macro perspectives, applying principles of universal design/better living design to personal living spaces and likewise utilizing the concept “sense of place” (neighborhood history, unique/significant features, architectural features that serve as place attachments/assets) to complete a St. Louis neighborhood analysis.

- HES/FCS 337 Family Relations (re-designed spring 2014): an undergraduate course, founded on the human ecological theory and developed as a writing intensive course; students examine the experience of family across the lifespan through an ecological lens, giving consideration to: 1) the definition of family; 2) family structures; 3) child wellbeing; 4) work/life balance; 5) social status of families; and 6) families in historical perspective. Students work collaboratively with the Fontbonne University Bosnia Memory Project, exploring the experience of family among the Bosnian community, a community of refugee families displaced by the war/genocide in their home country in the early 1990s.

Courses taught:
