

Public and Community Health Minor:

Health is an interdisciplinary field pulling in aspects from numerous fields of study, such as sociology, social work, psychology, occupational health, nursing, and business. Given this, the Public and Community Health program would like to create a Public and Community Health Minor. By adding this minor to a field of study, the students will make themselves more marketable and increase their chances of being employed by the second largest employment industry in the United States.

Public and Community Health Minor21 hrs

HEA 191 Personal Health (3)

HEA 201 Introduction to Public & Community Health (3)

HEA 301 Chronic & Communicable Diseases (3)

HEA 302 Consumer Health (3)

HEA 303 Health Behavior (3)

HEA 311 Epidemiology (3)

HIA 301 Overview of the Health Care Delivery System (3)

- Students must earn a grade of “C” or higher in all prerequisite courses and all HEA minor courses.
- Students are expected to take the necessary prerequisites listed under the course descriptions.
- No substitutions and/or alterations in the above curriculum shall be made without written approval of the public and community health program director.
- A minimum 2.50 overall GPA **AND** HEA minor GPA is required for admission and retention. If a student’s GPA (overall or HEA minor) drops below the required 2.5, the student will have one semester to improve the GPA. If after the subsequent semester, the GPA (overall or minor) is below 2.5, the student will no longer be able to remain in the HEA minor program.
