President Robert Jackson
Murray State University

Dear President Jackson,

On behalf of the Kentucky Dairy Development Council, we support the passage of HB 400 which relates to the potential of the establishment of a School of Veterinary Medicine at Murray State University. KDDC is a statewide dairy organization where all 340 permitted dairy farms are members. Through our membership we see the need for more large animal veterinarians.

A new veterinary school could help address this shortage which would be very beneficial to our dairy producers. Our desire is for Murray State to be successful in this endeavor and again we offer our support.

Respectfully,

Freeman Brundige
