

## Risk Indicator in Mapworks

**Office of Student Engagement and Success – Murray State University  
September 2017**

Mapworks has developed an algorithm based on a number of factors (high school GPA, college GPA, referrals, survey responses, etc.) which indicates a certain risk level for the student. This risk level is updated as new or additional information is added into Mapworks. *The risk indicator is not shared with the student*, but it helps the Office of Retention and others focus their efforts to help the student.

 RISK UPDATED: 08/08/2016	Green indicates the student is not currently at-risk	 RISK UPDATED: 08/08/2016	Red 1 or Red 2 indicate the student is at a high risk of not being retained
 RISK UPDATED: 08/08/2016	Yellow indicates the student is at a low risk of not being retained	 RISK UPDATED:	Gray indicates there is not enough information in Mapworks for the risk to be determined

To learn more about viewing information, entering in a contact or referral, or emailing the student, review our training documents on these and other topics at [www.murraystate.edu/success](http://www.murraystate.edu/success). If you have any further questions, please feel free to contact Matt Hicks (270-809-5344 or [mhicks8@murraystate.edu](mailto:mhicks8@murraystate.edu)).
